

AI in Medicine: What Iowa Physicians Need to Know About Liability

Description: Artificial intelligence (AI) is rapidly becoming part of everyday clinical practice administrative support. And while AI offers promising opportunities to improve efficiency, reduce administrative burden, and enhance patient care, it also raises important legal, ethical, and liability questions for physicians. This session will provide practical guidance on physician liability, documentation, oversight responsibilities, and patient safety considerations.

Objectives:

- Understand physician liability when using AI tools in clinical practice, including documentation, diagnostic support, and patient communication
- Explore the emerging question of what establishes the standard of care with regard to use of AI tools.
- Examine real-world risk management considerations, regulatory trends, and legal questions surrounding AI in medicine.
- exposures.

Date:

Thursday, August 20, 2026
(12:00 PM - 1:00 PM) (CDT)
