

Old MacDonald Bought the Farm: Social Drivers of Health

Description: Rural health is heavily influenced by agriculture, with factors like exposure to pesticides, physical labor, limited healthcare access, and social isolation contributing to lower life expectancy and higher rates of chronic disease. This session will focus on recognizing and managing the health effects of pesticide exposure and silo-filler's disease. Learners will gain the skills to identify the toxidromes associated with various pesticide classes, select appropriate antidotes, and apply effective management strategies.

Objectives:

- Learners will be able to recognize the toxidromes associated with different classes of pesticide exposure.
- Learners will be able to choose the antidote and appropriate management of these pesticide exposures.
- Learners will be able to recognize and treat silo-filler's disease.

Date:

Tuesday, August 12, 2025
(12:00 PM - 1:00 PM) (CDT)
